Make Your Mark.

Experience the benefits of direct product marking without the cost of ownership.

The Benefits of Contract Parts Marking Service

One way to keep manufacturing personnel to a minimum during this Coronavirus (Covid-19) Pandemic is to outsource non-essential tasks; those that are not mission-critical but necessary. **Parts marking** is one of those operations. Whereas most manufactured parts must be identified, your manufacturing manpower can be better utilized in other areas of production. JETEC will mark your parts to your specifications by first, sending an initial marked part for 1st article approval, marking your order and sending a Certificate of Compliance (COC) with each order. We can also package your parts for final shipment to your customer upon receipt.

Optimize your manufacturing operations, reduce re-work and improve quality consistency with direct product marking and JETEC's Contract Marking Services

JETEC's Contract Marking Services

At JETEC, we believe if you can make it, we can mark it.

Designed for both small run or continuous high volume jobs, JETEC's Contract Marking Services provides production operations with direct product marking capabilities when you need them. Our experts can help you select the best marking technology for your application. And we can mark virtually any surface with:

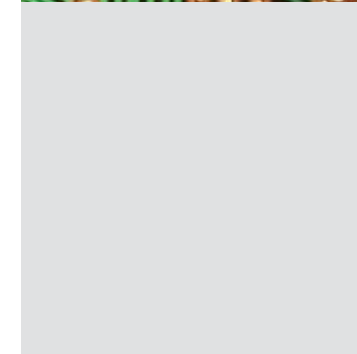

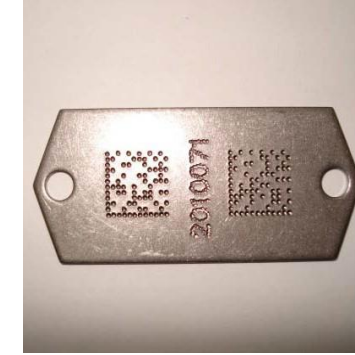

- ✓ Windows font characters
- ✓ Linear barcodes
- ✓ 2D and QRcodes
- ✓ Date and time stamps
- ✓ Serial numbers
- ✓ Custom logos and graphics

Contract Marking in 3 Steps:

With a JETEC Account Executive, scheduling new or reoccurring Contract Marking Services is fast and convenient:

1. Select your part,
2. Specify your mark, and
3. Select Additional Services

JETEC will mark, package and ship or deliver your parts within 5 business days. **(Expedite services are available upon requests.)**

Available Services Include

- ✓ Dot Peen/Stylus Marking
- ✓ Inkjet Printing
- ✓ Laser Etching
- ✓ UID and MIL-STD compliant Labels
- ✓ Verification and UID Registration*
- ✓ Compliance Certification
- ✓ Parts pick-up, packaging and delivery
- ✓ 5 business day standard turnaround

JETEC's Aerospace & Defense Experience

JETEC has provided product marking systems to major industry customers including Boeing, Honeywell, Northrop Grumman, Lockheed, Honeywell and Sikorsky in addition to government agencies and divisions of the Armed Forces. We have transitioned customers from manual to automated direct product marking methods and partnered in the process of developing and certifying inks for Aerospace & Defense application. With the ability to source inks and inkjet printers from a variety of vendors, JETEC ensures that your parts will be marked to meet Military Standard, ASTM E595 outgassing and FAA regulations as well as end customer requirements.
