Make Your Mark.

Experience the benefits of direct product marking without the cost of ownership.

The Benefits of Direct Product Marking

In a variety of industries, demand is increasing for parts to be viewed as unique and marked as an end product. Direct Product Marking provides the ability to mark and identify products using automated solutions that increase mark accuracy and consistency. JETEC's experienced solutions team can assist you in identifying the direct product marking technology best for your application.

JETEC's Contract Marking Services

At JETEC, we believe that if you can make it, we can mark it.

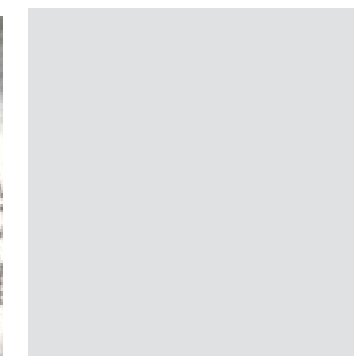

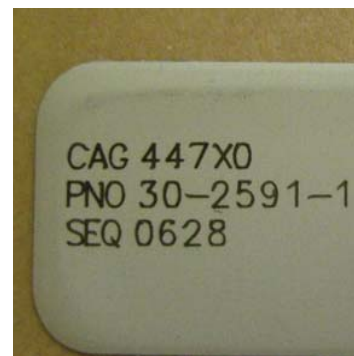

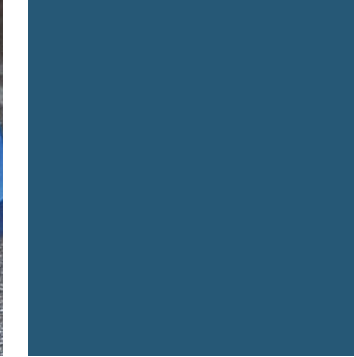

Designed for both small run or continuous high volume jobs, JETEC's Contract Marking Services provides production operations with direct product marking capabilities when you need them. Our customers include metal fabricators and cnc shops, pharmaceutical companies, electronics and pcb manufacturers, aerospace and dod suppliers and more. Using our in-house solutions we can mark virtually any surface with:

- ✓ Windows font characters
- ✓ Linear barcodes
- ✓ 2D and QR codes
- ✓ Date and time stamps
- ✓ Serial numbers
- ✓ Custom logos and graphics

Optimize your manufacturing operations, reduce re-work and improve quality consistency with direct product marking and JETEC's Contract Marking Services

Available Services Include

- ✓ Dot Peen/Stylus Marking
- ✓ Inkjet Printing
- ✓ Laser Etching (CO₂ and YAG)
- ✓ UID and MIL-STD compliant Labels
- ✓ Verification and UID Registration*
- ✓ Parts pick-up, packaging and delivery
- ✓ 5 business day standard turnaround, and
- ✓ All orders are shipped/delivered with a Certificate of Compliance

Contract Marking in 3 Steps:

With a JETEC Account Executive, scheduling new or reoccurring Contract Marking Services is as fast and convenient. :

1. Select your part,
2. Specify your mark, and
3. Select Additional Services

JETEC will mark, package and ship or deliver your parts within 5 business days of receipt of your order. Expedited services available.

Our solutions include the following capabilities:

- ✓ Chemical, heat and flux resistant
- ✓ Air-dry, thermal and UV inks available
- ✓ UV Readable and Aqueous cleaning agent resistance
- ✓ Support printing ANSI Grade 'C' or better barcodes
- ✓ NASA approved outgassing inks for space flight hardware
- ✓ Mark-out and Black-Out services available
